# Regional Sales & Marketing BI

Delivered orders · Jan 2023 to Dec 2025 · 80.7K orders, 21.8K customers

Executive Overview | Marketing & Customers | Operations & Experience

| Total Revenue | Total Orders | ROAS | On-Time Delivery % |
|---|---|---|---|
| ₹ 1.98bn | 81K | 1.93 | 57.13% |

**Key takeaways**

- **Growth came in 2025:** Delivered revenue was roughly flat in 2024 (about -2% vs 2023), then accelerated through 2025.
- **Q4 2025 growth is volume-driven**: Monthly orders roughly doubled while AOV stayed flat. New and returning customers both rose about 60-70%, and marketing spend alone doesn't explain it.
- **Marketing returns are uneven:** Overall ROAS is 1.93. Direct, Organic and Referral lead, while Social Media - Facebook (0.9) is below break-even.
- **Delivery is steady but often late:** About 57% of shipments are on time, unchanged during the Q4 surge.
- **Returns are concentrated:** About 10% of delivered orders have a return. At item level the overall rate is 4.7%, with Footwear (8.5%) and Fashion (7.4%) the highest.

**Definitions**

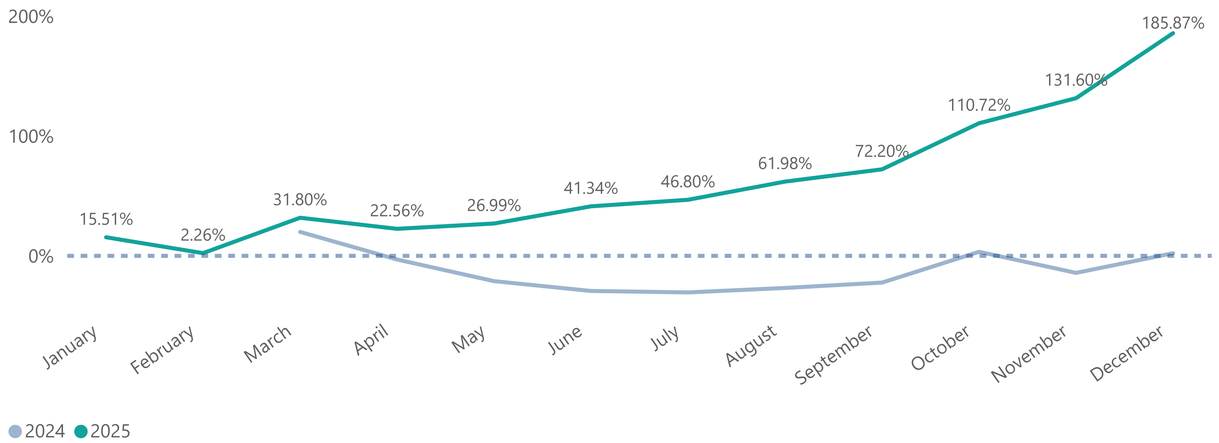

- High-Ticket = order value at or above the 75th percentile (P75).
- Marketing spend is counted in each campaign's start month.
- Attributed revenue covers campaign-linked orders only.
- Return rate by category counts returned items; the card counts orders.
- On-time % = shipments not flagged as delayed.
- Revenue, profit and orders count delivered orders only.
- Attributed revenue includes tax and shipping (order amount, delivered orders).
- New Customers counts each customer's first order of any status.
- Blended CAC = total marketing spend ÷ all new customers.
- Order Refunds = full refunds on cancelled and returned orders.
- Synthetic dataset, for portfolio use.
